

Thank you for checking out my project, I'm super excited that you're giving it a try :D

This PDF is sized perfectly for A6. For the best results, print four of them on a single A4 page. You can cut along the red boundary or the white line, whichever you prefer.

Before sticking it on, please remember to

1. Test the QR code – Make sure it scans correctly.
2. Secure it properly – Use clear tape to keep it waterproof and in place.

And here's the exciting part: **OpenTag is open source** <3

You're welcome to contribute, improve, or just explore the code. I'd love to see what you create!

Thanks once again for trying out OpenTag!
